This document was published for the Louisiana Department of Health and Hospitals, Office of Public Health, with funding made possible by the Louisiana Department of Health and Hospitals' Office of Public Health, Bureau of Primary Care and Rural Health, Adolescent School Health Program. This material is printed to provide information about the Adolescent School Health Program in accord with standards of printing established pursuant to R.S. 43:31. For more information about this project, contact the Adolescent School Health Program Office at (504) 568-8161.

2009-2010 marks another successful year for Louisiana's School-Based Health Centers (SBHCs). Four sites that were in the planning stage in 2008-2009 became operational this year, bringing the total number of SBHCs to 66 statewide. Two of the new sites (Albert Cammon/St. Rose and Morehouse Middle) brought SBHC services to previously unserved parishes.

The SBHCs serve as a vital link between education and health care systems by bringing health care to children at school, where they spend the majority of their time. The SBHCs are staffed by licensed medical and behavioral health professionals and offer comprehensive primary and preventive care to students who are underserved because of their geographical location in Health Professional Shortage Areas, their socioeconomic status, or other high risk characteristics. The SBHCs keep children in school, healthy and ready to learn. It should be noted that of the 141,414 visits to SBHCs in Louisiana, students were sent back to class 96% of the time. Parents and families benefit, not only by having ready access to health care at school, but also economically by reduced time away from work to take children to a doctor's office.

The accomplishments and successes of the SBHCs are not achieved through staff alone, but also through community support and partnerships. The SBHCs work closely with school administrators, local social service agencies, health care providers, parents, students, and business and religious leaders to meet the needs of students. Together, these many pieces fit together to form a unique healthcare system. The state financial commitment is matched by local entities who contribute both monetarily, as well as through human and material resources. Through everyone's commitment and dedication, SBHCs are able to continue to provide high quality and comprehensive services, despite economic difficulties on both the national and state level.

The positive impact of the SBHCs on student's health and attendance is explained in detail throughout this year's annual report. The SBHC's Highlights and Testimonials are just a few examples of the great need for SBHCs and the community's appreciation for them.

**Section One, Program Highlights & Overview**; details the history of the program, current location of SBHCs; the year's important events; standards governing program operations; the continuous quality improvement program; and SBHCs' *Best Practice Guidelines*.

**Section Two, Who Visits SBHCs and Why**; graphically displays why students visit SBHCs, including the top 10 reasons for a clinic visit. It includes information on visits by grade, gender, and ethnicity.

**Section Three, Louisiana SBHCs Profiles**; contains descriptive information on each SBHC, including names of community partners and advisory committee members.

**Appendices A-C** include (A) examples of diagnoses regularly seen in the SBHC; (B) the text of the state law that created the program; (C) and the financial statement for the Adolescent School Health Initiative/Office of Public Health for state fiscal year 2009-2010.

## Louisiana SBHCs Funded by Other Sources

### *Jackson Complex SBHC*

Jackson Complex SBHC opened in December 2005 through funding from Hurricane Katrina relief money from the W.K. Kellogg Foundation. The SBHC receives financial assistance from the Primary Care Providers for a Healthy Feliciana Community Clinic and grants from various foundations including one from the National Association of Coordinated Health Centers (NACHC).

### *St. Helena Central High SBHC*

In 1999, the St. Helena Central High SBHC began serving students upon receiving funding from the Health Resources and Services Administration, Bureau of Primary Care.

### *Bonnabel High SBHC*

Bonnabel High SBHC opened in March of 2009 and is operated by the Jefferson Parish School System. Medical services are provided by Ochsner Medical Foundation. Funding is from the Jefferson Parish School System, Ochsner Medical Foundation, and community donations. The school serves Ralph J. Bunche Academy as a feeder school with van transportation.

### *Scotlandville Elementary*

### *Broadmoor High*

### *Glasgow Middle*

Scotlandville Elementary SBHC opened in January 2007 through funding from the W.K. Kellogg Foundation, as well as the East Baton Rouge Parish School System.

Broadmoor High and Glasgow Middle are also in East Baton Rouge Parish. Both SBHCs opened during the 2009-2010 school year and were established through collaborative efforts of Health Centers in Schools, the East Baton Rouge School System, and private funders.

Region	Parish	SBHC Location	Grades Served	Number Schools Served	Total School Enrollment	Total SBHC Registration	% SBHC Students Enrolled	Total Patients Served

**Community Health Clinics  
Located on School Campuses**

The Interim LSU Public Hospital received partial funding through a grant from the U. S. Department of Health and Human Services to operate three community health clinics, located

on school campuses throughout the city of New Orleans. These clinics are staffed by hospital employees. The clinics provide services to the students, as well as the surrounding communities.

**Highlights**

**Initial Operating Grants**

The ASHP awarded six planning grants in FY 08-09 and all six successfully completed the planning process. In FY 09-10, ASHP obtained budget approval for increased dollars to issue a call for proposals for implementation grants. Applications for implementation dollars are subject to the same rigorous competitive review process as are planning grant applications. Although sponsors for all six planned sites submitted excellent proposals, OPH/ASHP could only fund four based on the funding available. The following four sponsors were awarded initial operating grants.

**Jefferson Parish School System (JPSS)**

The JPSS opened its fourth SBHC at Ehret High School on the West Bank of Jefferson Parish. Ehret is the largest high school in the metropolitan New Orleans area with an enrollment of approximately 1800 students. JPSS partnered with Ochsner Health System as the medical provider for Ehret.

**Lafayette Parish School System (LPSS)**

The LPSS partnered with Opelousas General Health Services as the medical provider for a

new SBHC at Carencro Middle School. This is the second SBHC in Lafayette Parish and the first one sponsored by the school system.

**Morehouse Community Medical Center (MCMC)**

The MCMC, a Federally Qualified Health Center (FQHC), established a SBHC at Morehouse Junior High. The center will also serve Bastrop High School and the combined enrollment of the two schools is about 1400 students. This is the first SBHC to open in Morehouse Parish.

**St. Charles Community Health Center (SCCHC)**

The SCCHC opened the first SBHC in St. Charles Parish at Albert Cammon Middle School. The SBHC will also serve St. Rose Elementary School. This is only the second SBHC in all of Region 3, along with St. Mary Parish. SCCHC is a FQHC.

**Certifying non-OPH SBHCs for Medicaid**

The ASHP office, as part of its technical assistance and monitoring function, certifies non-OPH funded SBHCs as eligible to bill Medicaid as a SBHC provider type. To achieve this certification, a SBHC must meet all of ASHP's requirements, as detailed in the *Principles*,

*Standards and Guidelines for SBHCs in Louisiana.* This Medicaid certification authorizes the SBHC to receive a waiver to meet the requirement of needing a primary care physician referral for children age 10 or older, in order to be reimbursed for services provided in the SBHC. In 2009-2010, ASHP certified the following sites as eligible to apply as the SBHC provider type with Medicaid:

- Bonnabel High, sponsored by Jefferson Parish School System, Jefferson Parish
- Glasgow Middle and Broadmoor High, sponsored by Health Centers in Schools, East Baton Rouge Parish

### *Electronic Medical Record (EMR)*

The SBHCs in the greater New Orleans area entered year three of a Robert Wood Johnson Foundation grant that enabled 10 SBHCs (both OPH and non-OPH funded) to adopt Electronic Medical Records (EMRs) and to receive technical assistance from the Louisiana Public Health Institute to ensure full usage and adaptation to the SBHC environment. Across the state, SBHCs are pursuing the adoption of EMRs and are being assisted through the efforts of the Louisiana Health Care Quality Forum and other initiatives dedicated to the use of EMRs as one tool in the pursuit of achieving better health outcomes.

### *Collaboration with Office of Public Health's (OPH) STD and HIV Programs*

The ASHP continued its collaboration with OPH's STD and HIV Programs through distribution of Starlims software and printers to newly opened SBHCs and providing SBHC staff with access to HIV training sessions. Starlims is a Web-based system used by OPH's laboratory and the STD program that allows clinics to use computers to generate requisitions for lab tests and to print barcode labels for specimens. Starlims also allows a clinic to look up test results online.

### *Hypertension Project*

ASHP received a \$68,585 grant from Blue Cross/Blue Shield (BC/BS) Foundation of Louisiana to screen, diagnose, treat and manage hypertension in school age youth. The initial program focused on five pilot sites. The dollar amount of the grant is the projected amount that it costs to provide a

person with kidney dialysis for one year. Renal failure is just one possible side effect of untreated hypertension. As part of the project, ASHP staff and the SBHC field staff worked together to revise the *ASHP Hypertension Best Practice* to include the most current American Academy of Pediatrics (AAP) and Center for Disease Control and Prevention (CDC) guidelines; standardize coding and data collection across the five sites; develop protocols for lab work, follow up, and referral; and add a lifestyle counseling component as part of follow up procedures. The results of the pilot were impressive.

Following the pilot, BC/BS granted a rollover of remaining funds that allowed ASHP staff to train personnel in the remaining 60 SBHCs in project protocols so that SBHCs statewide could continue this important program into the 2010-2011 school year.

### *Obesity*

2009-2010 is the third year that ASHP has provided the Louisiana Obesity Council with prevalence data on Body Mass Index (BMI) for students who visit Louisiana's SBHCs. The BMIs are calculated using the CDC formula which is specifically designed to determine BMI in children. ASHP Best Practice guidelines require that height and weight measures be taken at least once per year on any child that visits the SBHC. SBHCs collected height and weight data on 16,057 students, consisting of 7,607 boys and 8,450 girls. The combined total for boys and girls showed that 295 students (1.84%) were underweight, 9,048 (56.35%) were within the normal weight range, 2,383 (14.84%) were overweight, and 4,331 (26.97%) fell into the obese category. For all categories, the percentage of girls was higher than the percentage of boys.

The staff at the Allen Parish SBHC initiated a “Testimonial Campaign” as a type of “satisfaction survey” and advocacy effort for the SBHC. They received 225 testimonials from the students and over 20 from parents. The staff sent 156 of these testimonials to Governor Jindal and to various other officials within state government, especially administrators within the Department of Health and Hospitals. The idea caught on with other SBHCs around the state. Here are just a few of the “rave reviews” the SBHCs received.

### *From Students at the Allen Parish School-Based Health Center*

“The reason why I like going to the School-Based Health Center is because everyone in there is sweet and very caring. I feel safe, warmth and loved when I go in there. Everyone in there knows what they are doing and also knows how to make you feel better. Also, they make you feel important and I know whenever I need something, I can count on them!”

“I like going to our School-Based Health Center because they are always friendly. Mrs. Phyllis Crawford is always there when you need her. Mrs. Sylvia Crawford always knows the right care each patient needs. The nurses always call in medicine for any treatment you may have. I know my family trusts them because they are always on top of things. The School-Based Health Center is the best place to go for any treatment.”

“I like going to our School-Based Health Center because if I’m sick, they give me the medicine required. I like going there for another reason: the kind nurses tell me what type of things I should and shouldn’t do and what I should and shouldn’t eat. When I go there, there’s no reason to be afraid because the nurses are nice and the treatments are quick.”

“I like going to our School-Based Health Center because it allows us to learn what we need if

we return to class. It allows us to get physicals in our school if we are going to participate in sports. The SBHC lets us learn about our bodies and what happens when we do drugs with their informative posters. When I have a problem they fix my problem and let me go back to class.”

### *From Parents and Students at St. Martin Parish School-Based Health Centers*

“The School-Based Health Center was and has been wonderful to my son. They have helped him to cope and deal with problems and with school. It is also great to have the center to call or bring my child to, when I am not able to get a doctor’s appointment the day he is ill. In addition, some schools are able to have a bus come to school to pick-up students who don’t have transportation to the health center. That is very much needed for the parents who work and are not able to leave work or those parents on foot during the day.”

*Catahoula Elementary Parent and School Employee*

“The nurses are friendly and helpful. The counselor is very good at helping my child with his problem with test fear, anger and not wanting to stay in school.”

*Catahoula Elementary Parent*

“They give a lot of help to parents and kids. It is very good for the system.”

*Catahoula Elementary Student*

“I like that it is quiet and not too loud. Also everyone is very nice and caring, and also how they are very calm.”

*St. Martinville High Student*

“I think the SBHC is very nice. The students get to come to the health center while they are attending school. It is just a few minutes of school to be missed for any sickness. They get to be treated here or sent home if need be. The children are very well taken care of with a wonderful staff.”

*St. Martinville Parent*

*From Students at the O. Perry Walker School-Based Health Center*

“O. Perry Walker School-Based Health Clinic has an excellent staff that is always generous, kind, loving, and helpful. Every time I come in the clinic I feel like I am at home because the staff treats me like family.”

“The SBHC has helped me not miss days and stay in school. The treatment was nice and helped whenever I had a headache.”

“The SBHC has helped me stay in school and not miss days. The treatment was nice and now my bones feel 100% better since Dr. King helped me. Thanks for the help!”

“The SBHC has had a huge impact on my health by me not being able to see a doctor. I can always come to the clinic, return to class and get my lesson without missing school.”

“SBHC has had a pretty big impact on my life as far as confidence, acceptance and guidance. The team members are an absolute joy to hang around! They’re very serious about their work and they do it well. No child is left behind-ever! I enjoyed and cherished my times with them and will always keep their kind words and helpful advice at heart. I am utterly grateful for them.”

“The impact the SBHC has had on my health was and still is that they are always there when you need them. They would never not have what you need and plus they help you with other things other than what they’re paid to do. For example, they help you with problems to help you understand them better. Also they help to keep students in school by not turning their backs to them and most of all they always are able to answer any question that you throw at them. They just have loving and warming attitudes towards everyone at all times.”

“They are loving people. They care for the kids and they are positive role models. They are women who combine working for us with fun. They love their job and the kids. They care for us like their own.”

“The clinic is very helpful for our school because sometimes students will go home because they are not feeling good. Now all they have to do is go to the clinic. There are some students who do not have medical insurance so this is easy access for them when they are at school.”

“My comment on the social worker is that she is kind and sweet and always very supportive. The nurses and doctors took care of me very good. The nurses always have anything that I need. The doctors treated me with excellent care.”

## SBHC Funding History

Fiscal Year	Funding Source	Number of SBHCs
1987-88 1989-90	Robert Wood Johnson (RWJ) Foundation grant Louisiana Legislature asks OPH to study SBHC expansion	2 in Baton Rouge 1 in New Orleans
1990-91	Adolescent School Health Initiative Act passes, authorizing OPH to develop SBHCs	
1992-93	Maternal and Child Health (MCH) Block Grant	Affiliation established with 1 SBHC in W. Feliciana & the 3 RWJ SBHCs

1993-94	MCH Block Grant	5 new SBHCs open in rural & inner city urban areas
1994-95	MCH Block Grant; \$1.6 million in one-time state funds; Child Care & Development Block Grant for day-care activities; RWJ Making the Grade Planning Grant	1 new SBHC opens; 14 in planning stages; 10 supportive projects
1995-96	MCH Block Grant; \$2.5 million in state budget; RWJ Making the Grade Planning Grant	5 new SBHCs open; 8 continue planning
1996-97	MCH Block Grant; \$1.6 million RWJ Foundation Implementation Grant; \$2.65 million state legislative appropriation	23 operational SBHCs 8 planning for 1997-98 operation
1997-98	MCH Block Grant; continuation of RWJ Foundation grant; continuation of state legislative appropriation	30 operational SBHCs 7 planning for 1998-99 operation
1998-99	Continuation of existing funding sources; additional \$600,000 in state legislative appropriation	35 operational SBHCs
1999-00	Last year of RWJ Foundation Grant; continuation of MCH Block Grant & state legislative appropriation; additional \$1,018,176 in state legislative appropriation	40 operational SBHCs
2000-01	Continuation of MCH Block Grant & state legislative appropriation; additional \$1,618,588 in state legislative appropriation	47 operational SBHCs 6 planning SBHCs
2001-02	Continuation of MCH Block Grant & state legislative appropriation; additional \$820,000 in state legislative appropriation	53 operational SBHCs
2002-03	Continuation of MCH Block Grant & state legislative appropriation. \$100,000 in Prevention Block Grant to implement the <i>Best Practices for Prevention in SBHCs</i> Initiative	51 operational SBHCs
2003-04	Continuation of MCH Block Grant, Prevention Block Grant, & state legislative appropriation. additional \$264,800 in state legislative appropriation	53 operational SBHCs
2004-05	Continuation of MCH Block Grant & state legislative appropriation.	54 operational SBHCs
2005-06	Continuation of MCH Block Grant & state legislative appropriation.	47 operational SBHCs
2006-07	Continuation of MCH Block Grant; additional \$1.6 million in state legislative appropriation	52 operational SBHCs 9 planning grantees projected
2007-08	Continuation of MCH Block Grant; additional \$855,284 in state legislative appropriation.	62 operational SBHCs
2008-09	Increase in MCH Block Grant; additional \$325,000 in state legislative appropriation; 2.5% mid-year across the board increase to SBHC contracts	62 operational SBHCs, 6 planning grants projected
2009-10	4% across the board cut to existing SBHC contracts due to decrease in MCH Block Grant funding and state legislative appropriation; additional allocation for implementation grants led to four out of six planning grantees becoming operational; two sites received one time legislative line item appropriation	66 operational SBHCs

## *Primary Goal*

To provide convenient access to preventive and primary health services for students who might otherwise have limited or no access to health care.

To meet the physical and emotional health needs of adolescents at their school sites.

## *Community Participation*

All health centers must originate as a community initiative. State funding is dependent upon evidence of broad community participation.

## *Sponsoring Agency*

The sponsoring agency must be either a public or a private non-profit institution (i.e., health center, hospital, medical school, health department, youth serving agency, school or school system) locally suited and fiscally viable to administer and operate a health center serving the needs of school age youth.

## *School and School District*

The host school should agree to work cooperatively with its health center, particularly in developing and implementing a full-scale coordinated school health program. School board approval is a prerequisite for a grant of state funds for planning or operation.

## *Services*

SBHCs must offer comprehensive preventive and primary health services that address the physical, emotional, and educational needs of its student population. Services provided should include medical screenings; treatment for common illnesses and minor injuries; referral and follow-up for serious illnesses and emergencies; on-site care, consultation, referral and follow-up for pregnancy; chronic diseases and disorders; and emotional and mental/behavioral health problems; comprehensive physicals; immunizations; laboratory testing; and preventive services to reduce high-risk behaviors.

## *Parental Consent*

A parent or guardian must sign a consent form, approved by school authorities, for a student to receive health center services. Parents may indicate which services they do not wish their

children to receive by submitting a written statement of exclusion.

## *Operating Policies*

The hours of operation should ensure that students have easy access to the center's services. In general, SBHCs should have both before and after-school hours and should operate for some period of time during the summer.

Every School-Based Health Center is required to promote abstinence. Centers are prohibited by state law from distributing contraceptives or abortifacient drugs or devices, and from counseling or advocating abortion, or referring any student to an organization for counseling or advocating abortion.

## *Staffing*

Services at the school health centers are provided by multi-disciplinary teams including physicians, nurse practitioners, registered nurses, and licensed behavioral health professionals. In addition, the SBHC is staffed with an office assistant and an administrator.

## *Selection Criteria*

The ASHP seeks to provide services to young people with limited or no access to health care providers. Grants are made through a competitive call for proposals process with decisions based upon the socioeconomic and health needs of the student population to be served, the health services available in the communities, the level of community support, the likelihood of success in developing and operating SBHCs that will fulfill its service objectives, financial stability, sustainability and the working relationship between the schools and health care communities.

## *Continuum of Care*

Centers must execute cooperative agreements with community health care providers to link students to support and specialty services not provided at the school site. Centers must arrange 24-hour coverage, ensuring that students have access to services during non-operating hours, including nights, weekends, holidays and summer vacation.

## Purpose of CQI On-Site Reviews

## Continuous Quality Improvement Tools

**LAPERT I**  
focuses on verifying the SBHC's self-reported performance in 3 areas: administrative, medical, and behavioral health.

**LAPERT II**  
focuses on core sentinel conditions and consists primarily of patient chart audits and data.

## Results of Continuous Quality Improvement

ASHP uses the Louisiana Performance Effectiveness Review Tools I and II (LaPERT I & II) to conduct quality assurance reviews. LaPERT I was adapted from the New York quality assurance tool and LaPERT II was based on the National Assembly on School-Based Health Care's protocol. LaPERT I evaluates a SBHC's adherence to overall standards and LaPERT II focuses on sentinel conditions, such as comprehensive physical exams, immunization rates, asthma management, data management, academic achievement, and health insurance enrollment. Nine SBHCs were reviewed in 2009-10 as part of the rigorous continuous quality improvement program. Improvements continue to be measured.

- Overall immunization rates improved during the year. When randomly selected charts were audited, the number of students with up-to-date immunizations increased from 62% in the first quarter, to 87% in the fourth quarter.
- For students receiving a comprehensive exam, 100% of charts audited had documentation of a tobacco screening and, if necessary, counseling to address tobacco use.
- Of random charts audited during site visits, 100% had a yearly height, weight, blood pressure and body mass index documented. In addition, all random charts audited were up-to-date with immunizations.
- SBHC staff work closely with school personnel and have been able to document improved grades for students who were previously struggling.
- SBHCs continue to make an impact on keeping rates of uninsured students low (see chart at right).

The Adolescent School Health Program (ASHP) launched the Best Practices for Prevention in SBHCs Initiative in 2001-2002. The Best Practices are a set of clinical guidelines for SBHC preventive services based on national recommendations. SBHC staff participates in ongoing educational workshops where the guidelines are highlighted. As the SBHCs implement the Best Practices, they also measure success by collecting outcome data. The Best Practices have been incorporated into the ASHP Continuous Quality Improvement (CQI) Program and correspond to the core measures of quality that are evaluated on site visits.

To date the following Best Practices have been developed: Type 2 Diabetes Screening, Hypertension Screening, Immunization Administration, Cervical Cancer Screening, Sexually Transmitted Diseases (STD) Screening, Tobacco Cessation, and Resource Tool for Comprehensive Physical Exams.

### *Comprehensive Physical Exams Including Risky Behavior Assessment*

Promoting positive, long term health outcomes through prevention and wellness programming is the cornerstone of the SBHC model of physical and behavioral health care. Adult health habits, both good and bad, are often established during adolescence. Some adolescents engage in risky behaviors that can jeopardize their current health and lead to poor health later in life. Therefore, it is important to identify these risky behaviors in youth and attempt to change these behaviors to more positive habits. As standard procedure, SBHCs administer an assessment of risky behaviors to all students who receive comprehensive physical exams. During the 2009-10 school year, students completed 8,383 risk assessments. Providers identified the following risky behaviors:

injury, educational circumstance, substance use/abuse, family circumstances, high-risk sexual behavior, behavioral and interpersonal problems, family disruption, dietary issues, bereavement, and other concerns. Once issues are identified, providers counsel students regarding specific risks and engage them in adopting alternate behaviors that prevent these risks from becoming bad health habits. This may be done in individual counseling sessions or through group sessions whereby students support one another to adopt healthy behaviors. By identifying risky behaviors early and providing health education counseling, SBHCs can prevent students from developing bad habits that contribute to poor health outcomes in adulthood.

### *Screening for Sexually Transmitted Disease (STD) and Human Immunodeficiency Virus (HIV)*

STDs can cause serious illness, including chronic pain, infertility, infections in the unborn child, and potentially fatal ectopic pregnancies. Persons with STDs are more susceptible to contracting HIV/AIDS. National data indicate that HIV infection and AIDS remain a leading cause of mortality and morbidity in the United States. A large percentage of people are diagnosed with AIDS in early adulthood. This means that they contracted HIV as adolescents, or earlier. Survival decreased as age at diagnosis increased among persons at least 35 years old at diagnosis and in comparison with persons younger than 35. Early detection and treatment of STDs/HIV can prevent chronic disease and deaths, thus saving lives, improving a person's quality of life and productivity, and reducing health care costs.

ASHP has a Best Practice for both STD and HIV screening/prevention. Based on the Center for Disease Control and Prevention (CDC) and the American Academy of Pediatrics (AAP)

guidelines, ASHP's Best Practice recommends STD screening for any student who is sexually active or has symptoms that may indicate the existence of an STD. The CDC guideline for HIV is that all patients aged 13-64 be screened routinely for HIV infection, regardless of risk. Currently SBHCs are encouraged, but not required, to implement rapid HIV testing for students within the CDC recommended age range. In conjunction with the OPH STD/HIV Program, ASHP coordinates training for SBHC staff in STD/HIV screening, treatment, referral and counseling protocols and procedures.

In 2009-2010, SBHCs performed 751 STD screenings, a 9% increase over 2008-2009. There were 3,396 HIV screenings, representing a 46% increase over the previous year total. Students who test positive for STDs are either treated within the SBHCs, or referred out. Students who test positive for HIV are referred to appropriate resources. SBHCs provide health education and counseling for all students with concerns related to STDs and HIV, whether or not a student is found positive for these conditions. For information on STDs and HIV from CDC, click on the following links:

<http://www.cdc.gov/std/>

<http://www.cdc.gov/hiv/>

### *Screening for Hypertension & Type 2 Diabetes*

Obesity is a major risk factor for the development of hypertension and type 2 diabetes in youth. SBHCs continue to identify at risk youth with hypertension and type 2 diabetes. During the 2009-2010 school year, 808 students at risk were screened for type 2 diabetes at SBHCs across the state. Twelve, or 1.5%, of the students screened tested positive for type 2 diabetes and were referred to their primary care physician for follow up. The SBHCs are available to assist in monitoring and management of the disease. Weight reduction, along with an exercise program, is an important step in the management of both hypertension and type 2 diabetes. The school setting provides an excellent opportunity for education on lifestyle changes and the implementation

of policies and programs that can address obesity. The ASHP preceived a grant from Blue Cross Blue Shield of Louisiana to further refine procedures and protocols related to screening for hypertension. The program will be piloted in five SBHCs in FY 2009-2010 and will include lifestyle counseling on nutrition and physical activity as a component.

### *Immunizations*

As part of their mission to provide preventive services to school-aged children in Louisiana, SBHCs provided 42,306 immunizations for their students throughout the year. In response to the H1N1 pandemic of the 2009-2010 school year, many SBHCs were integral partners in immunization drives, as well as providing education on how to prevent the spread of the disease.

Another example is the pivotal role the three SBHCs in St. Martin Parish played in the efforts of the school district to assist the community with preventive measures against influenza. The medical staff of the SBHCs teamed up with the school nurses to provide presentations to each of the schools on proper hand washing, which included using a black light, a video, handouts, and posters to remind students and staff of the importance of proper hygiene. In December, the coordinator of the three SBHCs organized and coordinated a collaborative effort between the SBHCs, the school nurse program, the Louisiana Department of Education, and the Office of Public Health to bring H1N1 vaccinations to the students and communities in St. Martin Parish. Three separate vaccination clinics were held on Saturdays and 1209 vaccinations were given. SBHC staff, school nurse staff, and Office of Public Health staff assisted in various capacities, including: registering patients; administering the vaccines; and crowd control. The vaccination clinic held at Breaux Bridge Junior High School, the location of one of the St. Martin SBHCs, had the highest turnout for all of Region IV. The school district would not have been able to provide this service if not for the SBHC staff.

## Section Two

# Who Visits SBHCs and Why

*A Glance at 2009-2010 Utilization*

47,133 Students Registered at SBHCs  
 32,151 Students Received Services at SBHCs  
 141,414 Total Individual Visits Made to SBHCs  
 4.4 Average Number of Visits Per Student  
 5,257 Total Visits For Group Counseling

*Number of Conditions Seen at SBHCs, by Category*

Number of Visits

\* OPH-ASHP categories were changed 2008-2009 to reflect the ICD-9 code book categories. The Symptoms, Signs & Ill-Defined Conditions Category includes, but is not limited to the following conditions: abdominal pain, cough, headache and nausea.

## *Leading Reasons for Preventive Health, Observation, Exams, Visits*

## *Leading Reasons for Behavioral Health Visits*

### *Leading Conditions for Injury and Illness Related Visits*

### *Leading Reasons for Health Counseling and Educational Visits*

### Total Visits by Sex, 2009-2010

### Total Visits by Race, 2009-2010

### Total Visits by Grade for All SBHCs

### Total Visits by Disposition, 2009-2010

Of the 141,414 visits to Louisiana SBHCs, students were sent back to class 96% of the time, thereby reducing time students are out of school.

## *Comparison Ranking of Top 10 Conditions, Rural versus Urban*

### **Rural**

1. Preventive Health, Observation, Exams
2. Symptoms, Signs & Ill-Defined Conditions
3. Psychosocial & Economic Circumstances
4. Respiratory System
5. Injury & Poisoning
6. Health Education
7. Mental Disorders
8. Digestive System
9. Nervous System & Sense Organs
10. Musculoskeletal System

### **Urban**

1. Preventive Health, Observation, Exams
2. Symptoms, Signs & Ill-Defined Conditions
3. Respiratory System
4. Health Education
5. Psychosocial & Economic Circumstances
6. Mental Disorders
7. Injury & Poisoning
8. Digestive System
9. Musculoskeletal System
10. Nervous System & Sense Organs

## *Total Visits by Provider Type, 2009-2010*

Services in SBHCs are provided by a multidisciplinary team of professionals who work together to address all aspects of the students' well being: physical, mental, and emotional. (See chart on the left.) All SBHCs are staffed with nurses, primary care providers (nurse practitioners and physicians) and licensed behavioral health professionals. Some SBHCs also have psychiatrists and psychologists. A few SBHCs are able to offer dental services onsite.

## *Total Visits by Rural and Urban SBHC Sites, 2009-2010*

The Adolescent School Health Program began in urban schools with high concentrations of economically disadvantaged and uninsured students. However, immediately after its inception, rural communities recognized the immense value SBHCs have toward providing health care services to school-age youth otherwise lacking access to health care. While all young people experience similar needs, both the obvious and subtle differences can be addressed by the local SBHC, because it remains a community-based initiative.

# Total Student Visits by Site, 2009-2010

(This includes 5,257 visits for treatment intervention groups)

## Rural Sites

Number of Visits

## Urban Sites

Number of Visits

### Type of Schools That House SBHCs

Although SBHCs are mandated to serve middle and high school students, primary/elementary schools serve as “feeder” locations, so that younger students also have access to SBHC services. In some areas, SBHCs are located on primary/elementary school campuses when no space is available at nearby middle or high schools.

The primary reasons OPH funds SBHCs are demonstrated need and lack of access to care.

### Sources of SBHC Funding

### Insurance Status of SBHC Patients

For every dollar the state invests in SBHCs, an additional 61 cents is provided by other sources, including local communities, federal and private grants, and Medicaid. The local match of 20% is a requirement of the OPH grant, which these communities consistently exceed.

Recognizing that adolescents often delay or avoid seeking needed health services in traditional settings, the Louisiana Medicaid Program designated SBHCs as a unique provider type in Louisiana’s Community CARE Program in 2004-05.

### Type of Sponsorship for Each SBHC

*--The date following the board member's name is the date they joined the HCCS Board. The non-profit organization, incorporated in 1999, allows each board member to serve two three-year terms of office. If the member is an officer, then they serve until they have completed their duties as an officer. The medical director is a member for the duration of tenure as medical director.*

EXAMPLES OF DIAGNOSES WITHIN EACH CATEGORY  
OF CONDITIONS SEEN AT LOUISIANA SBHCs

*International Classification of Disease, Version 9 (ICD-9) codes are grouped into general categories. Examples of diagnoses within each category follow:*

**Cardiovascular & Blood:** hypertension, hypotension, and blood disorders

**Central Nervous System & Head:** concussions, headaches, seizure disorders, cerebral palsy, and syncope

**Dental & Oral:** dental caries and other diseases of teeth and gums

**Drug Abuse & Dependence:** diagnoses related to alcohol abuse, cannabis abuse, and tobacco use

**Ear, Nose & Throat:** diagnoses related to conditions of: the ear, such as ear infections and wax build-up; the nose, such as nose bleeds and diseases of the nasal cavity and sinuses; and the throat, such as pharyngitis and strep throat

**Eyes:** diagnoses related to eyes and vision such as vision problems, conjunctivitis, injury to the eye, and near-sightedness

**Gastrointestinal:** diarrhea, irritable bowel syndrome, constipation, gastroenteritis, and other digestive disorders

**General Preventive Medicine:** immunizations, comprehensive physical examinations with risk assessment, and special screenings

**Genitourinary:** urinary tract infections

**Gynecology & Breast:** dysmenorrhea (painful menstruation), irregular menses, and other gynecological disorders

**Health Counseling & Education:** not limited to, but includes dissemination of information on personal health, consumer health, nutritional health, substance use and abuse, HIV/AIDS, and injury prevention and safety

**Mental & Behavioral Health:** includes all mental health service provisions such as individual counseling, treatment intervention groups, and case management. Reasons for behavioral health visits are grouped into subcategories such as mental health disorders, academic problems, substance use/abuse problems, and illness-related problems.

**Metabolic & Nutrition:** obesity and dehydration

**Miscellaneous:** reported conditions not related to a specific diagnosis category such as abnormal results of blood tests, malaise and fatigue.

**Musculoskeletal & Trauma:** joint pain, joint swelling, tendonitis, scoliosis, and any bone, cartilage, or muscle disorders; includes injuries

**Pregnancy & Related Issues:** suspected pregnancy, pregnancy counseling, prenatal care, postpartum care, and bleeding in pregnancy

**Pulmonary & Respiratory:** acute lower & upper respiratory infections, asthma, and other respiratory disorders

**Sexually Transmitted Diseases:** chlamydia, gonorrhea, syphilis, genital warts, genital herpes and HIV/AIDS

**Skin & Subcutaneous:** diagnoses related to skin disorders such as acne, warts, psoriasis, scabies, head lice, ringworm, athlete's foot, contact dermatitis, and ingrown nails

## ADOLESCENT SCHOOL HEALTH INITIATIVE ACT R.S. 40:31.3

To enact R.S. 40:31.3, relative to adolescent school health; to require the Department of Health and Hospitals, Office of Public Health, to establish an adolescent school health initiative; and to provide for related matters.

Be it enacted by the Legislature of Louisiana:

Section 1. R.S. 40:31.3 is hereby enacted to read as follows:

31.3. Adolescent school health initiative; health centers in schools

A. The Department of Health and Hospitals, Office of Public Health, shall establish

an adolescent school health initiative to facilitate and encourage development of comprehensive health centers in public middle and secondary schools in Louisiana which shall provide preventive health services, counseling, acute health services, and appropriate referral for acute health services. Such initiative shall be subject to the approval of the local school systems.

B. The Office of Public Health shall:

(1) Coordinate efforts to facilitate and encourage establishment of health centers in schools by providing information, technical assistance, direction, and, to the extent appropriate, funds to locally based entities for the establishment and operation of health centers in middle and secondary schools.

(2) Convene and participate in an intergovernmental coordinating council which shall be composed of representatives from the department of education, social services, health and hospitals, and other governmental entities or programs

related to health services to assist in implementation, oversight, and funding assistance for health centers in schools.

(3) Apply for and assist local efforts to apply for all available public and private funds to establish and operate health centers in schools.

(4) Establish procedures for allocation of funds appropriated or otherwise available

to the program in a manner which prioritizes funding according to the urgency and degree of health care needs among the various middle and secondary school populations.

(5) Establish criteria to be considered in selection of locations or placement of health centers in schools.

C. Health centers in schools are prohibited from:

(1) Counseling or advocating abortion in any way or referring any student to any organization for counseling or advocating abortion.

(2) Distributing at any public school any contraceptive or abortifacient drug, device, or other similar product.

D. The provisions of this Section shall be applicable only to the extent that funds are made available for this purpose from public or private sources.

Section 2. This Act shall become effective upon signature by the governor or, if not signed by the governor, upon expiration of the time for bills to become law without signature

by the governor, as provided in Article III, Section 18 of the Constitution of Louisiana.

Signed by Governor Buddy Roemer

July 29, 1991.
